

Business IT Solutions

Managed IT Services

System Optimization, Management, and End-User Support

Many small to medium sized businesses cannot afford the expense of a dedicated IT department. However, their IT systems are just as "Mission Critical" as larger organizations.

M²Technology Managed IT Services offer affordable, proactive levels of end-user support, systems management, maintenance and administration — ensuring continuous employee productivity and a reduction of overall downtime.

M²Technology provides back-end, systems support, remote assistance, and client access to enterprise support technologies without the expense of building or maintaining the necessary hardware and software infrastructure. Reduce costly downtime and experience peace of mind knowing IT support is always available.

Cloud Services

Anywhere, Any Platform Access To Business Productivity Applications

M2SecureCloud is a software as a service (SaaS) offering that provides access to common business applications from any location using your computer, compatible tablet, or mobile device with Internet access. M2SecureCloud hosted business applications include:

- Microsoft Office 2010 (with Word, Excel, Powerpoint, Publisher and Outlook)
- Microsoft Dynamics and CRM
- Microsoft SharePoint
- Microsoft Exchange
- Many Other Cloud Hosted Business Tools

Applications can be accessed by almost any Internet capable device, including Windows and Mac computers, smart phones, iPads and thin clients. Eliminate costly software purchases, licensing, updating and upgrades with our low cost per/seat monthly fee.

IT Consulting

Network Design, Planning, and Employee Productivity Solutions

M²Technology provides IT Consulting services designed for business need. We offer a variety of cost effective, IT solutions that streamline business operations while reducing overall IT expenses.

- Microsoft Client-Server Solutions
- Exchange, IIS, and Terminal Services
- Active Directory and Group Policy
- Novell to Microsoft Windows Migrations
- Technology Needs Assessments
- Infrastructure Solution Design
- Disaster Recovery Planning
- IT Project Development and Implementation
- WAN, VPN and Firewall Solutions
- Help Desk Solutions
- Offsite/Online Data Backup Solutions
- Intrusion Detection and Prevention

MS Exchange Hosting

Enterprise E-mail Services with SharePoint Group Collaboration

MS Exchange 2010 Hosting provides unified, on-demand, business communication by offering direct synchronization of messaging, contacts and calendar information between your desktop, mobile device and Outlook Web Access (OWA). Experience all the features of Exchange 2010 without the hardware, software, licensing and maintenance expense.

Web Hosting

Web and E-mail Hosting with Enterprise SPAM Filtration

M²Technology offers affordable Web hosting designed for availability and performance. We provide a variety of web hosting packages that include personalized, managed support at very reasonable rates. Our easy to use website control panel provides full administration of your hosting account, E-mail, DNS and a variety of advanced features.

Web Design

Website Design, SEO, and Content Management Systems

M²Technology provides a full range of affordable website solutions to extend your business to the Internet. An important part of what we do is to develop efficient business-to-client communication, stronger visual dynamics that foster your professional image, and functionality that allows your website perform to its fullest potential.

Server Colocation

House Your Servers in a Secure, Pittsburgh Based, Data Center

M²Technology provides Server Colocation services as an alternative to traditional shared and virtual web hosting. Your hardware is housed in a Pittsburgh based, secure, fully redundant environment that ensures 24x7 uptime with access to multiple Tier 1 telecom providers. Bulletproof your application uptime and availability.
